

**Measuring Guide for 'ARGYLL' Style Trews  
(i.e. trews have a navel height, 3 inch deep waistband).**

The following measurements are required in inches only, please stand straight and look forward throughout the measuring process:-

- A     **Waist:**** Measure around the waist at **'NAVEL' Height**.  
(This measurement will be bigger than your normal waistline measurement, don't worry!)
- B     **Seat:**** Measure around the 'fullest/biggest part' of the 'buttocks/derriere', which sticks out the most.
- C     **Thigh:**** Measure around the widest part of the thigh.
- D     **Inside Leg:**** Measure from where the crotch seam meets the top of the inside leg seam, down to your 'preferred length' of trouser.\*
- E     **Outside Leg:**** Measure from your **'NAVEL' Height** down to your 'preferred length' of trouser.\*

**\* Your 'Preferred Length' of Trouser:**

Wear a pair of 'dress' trousers that you already like the 'finished length' of. And measure, as instructed above, to that actual **'preferred length'**, where the bottom of your trouser falls.

**Height:** In 'feet & inches', thank you.

***IMPORTANT: Please do not self-measure. Have a family member/colleague take each measurement. To ensure accuracy, DOUBLE CHECK all your measurements. As we cannot offer refunds on made to measure items. Any ill-fitting garments in need of adjustment are the responsibility of each customer.***
