

## Measuring Guide for 'ARGYLL' Style Trews (Argyll trews have a higher 3 inch deep waistband).

- Do not use any other measuring guide to send us your measurements, **use this guide only.**
- The following measurements are required in **inches only.**
- Stand straight and look forward throughout the measuring process.
- Do not self-measure, have a friend or relative do this.
- Use a cloth/plastic tape measure, not a DIY metal one.
- Measurements are to be taken against your **bare skin, not over clothes for: 'waist, seat and thigh'.**
- Do not trust your memory, write each measurement down as it is taken.

**Waist:** Measure around the waist at '**NAVEL**' Height.

(This measurement can be bigger than your normal waistline measurement, don't worry!)

**Seat:** Measure around the '**fullest/biggest part**' of the 'buttocks', which sticks out the most.

**Thigh:** Measure around the **widest** part of the thigh.

**Inside Leg:** Measure from where the crotch seam meets the top of the inside leg seam, down the inside of your leg, to your preferred length of trouser.

**Outside Leg:** Measure from the height of your '**NAVEL**', down the side of your leg, to your preferred length of trouser.

**Height:** In 'feet & inches'.

***IMPORTANT:***

*DOUBLE CHECK all your measurements.*

*We cannot offer refunds on made to measure items.*

*Any ill-fitting garments in need of adjustment are the responsibility of the customer.*
